

Arena

Arena

Arena is designed by
Torsteinsen Design for
Fora Form

ARENA is an elegant and smart auditorium chair designed by Torsteinsen design. They have created an ingenious standardized auditorium chair that can be inserted directly into any project, without any special adaptation. A chair that provides the freedom to furnish auditoriums as we've never seen before. Now creativity can flourish.

The chair has been developed in close cooperation with Fora Form's project group, which has solved challenges in large complex auditoriums for over 30 years. Today, ARENA responds to most of the challenges of the future, both when it comes to technology and user insight.

The result is Arena - one size fits all.

[See more and have a look at the launch of Arena](#)

- ★ **A standardized auditorium chair that can be used in any project, without customization.**
- ★ **The chair and armrest are designed to contribute to an efficient evacuation of the hall.**
- ★ **Freedom to furnish auditoriums as we've never seen before through an innovative new mounting bracket.**

Technical information:

- Curved seat and backrest for better comfort.
- 3 backrest heights with lumbar support in molded foam.
- Adjustable seat tilt with seat stops.
- Pre-assembled chair, ready to be placed in the auditorium.
- Can be delivered with long continuous tables. Can be retrofitted.
- Black armrest.
- Interchangeable cover.
- A gap of 20mm below the attachment for easier cleaning.
- Minimum step height: 150 mm.

Models:

Measurements:
