With its subtle gap, the new Knekk chair allows for reclining reflection and forward-leaning discussions. It has an elegant look and can be used with or without armrests.

Far from ostentatious, the Knekk chair comes across as friendly and welcoming. It automatically accommodates a seated position, allowing you to lean against the table for a chat or a meal without pushing your body forward on the chair.

Knekk is quite simple style and functionality uniquely expressed in solid wood. Seat pads are available for extra comfort, and chairs without armrests can be stacked.
