

Myk

Myk

**Myk is designed by
Lars Tornøe for Fora
Form**

Myk is a flexible table family designed with soft geometries as a starting point, and with wood as a material in the table design.

All tables are based on the same column base, either as T-base or X-base. The base consists of two main elements - vertical column in steel and horizontal beam in wood. The table has no sharp edges, which is repeated in the tabletops and provides a pleasant experience when touching the product.

Two sizes of both T and X-foot, different heights on the columns and a large selection of standard sizes and geometries makes Myk a table series with many options.

The table series can be used in most contexts such as canteen tables, bar tables, social zones tables or as a conference table.

The Myk base has adjustable plastic gliders.

★ **Table top in with soft rounded profile and rounded corners.**

★ **The horizontal wood base is an elegant way to incorporate wood as a solid and warm material in your interior.**

Technical information:

- 25 mm MDF with soft rounded profile, edge similar as table top,
- rounded corners.
- laminate, linoleum and veneer as recommended in Fora Form Menu
- Base in chrome black, epoxy RAL 9005 or white epoxy RAL 9016 at no additional cost
- menu NCS epoxy coating:
- Oak, black or stained wood cover.
- Elevated base with adjustable gliders.
