

Transeat

Transeat

**Transeat is designed
by Sven Ivar Dysthe
and Torsteinsen
Design for Fora Form**

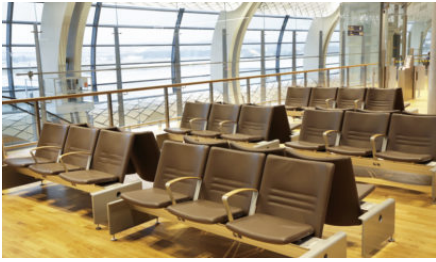

Oslo Airport has got new terminal furniture signed by the designers Torsteinsen Design and Dysthe Design.

Oslo Airport saw the value in a specially designed Norwegian design furniture that could interact with the updated architecture. The designers have focused on 2 user groups: the passengers and OSL - ie user experience and service / maintenance. Transeat consists of a supporting beam with flexible connection of "floating" modular elements. For today's passengers, it is essential that the seats have power access.

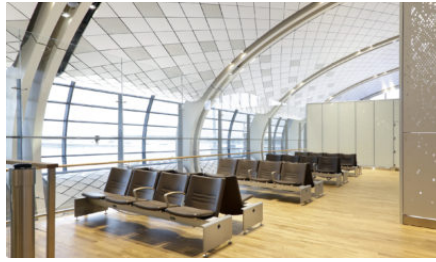

An extremely successful collaboration ensured the passengers a holistic, functional and beautiful airport with a pervasive modern Norwegian feel.

★ **Honest construction with excellent material utilization**
